**CATALOGUE 2020** 

## WE GENERATE EXCITEMENT.

Since the foundation of the company in 1890 until today the goal has remained the same: the highest quality in products and services. Nevertheless, the circumstances, tasks and challenges have changed, of course. By focussing on our core areas of expertise, we have long set new standards for innovative clamping technology - driven by our own development, the greatest possible flexibility and passion for individual solutions.

All this is only possible with committed and contented employees. Respectful interaction with others, personal development and measures for the wellbeing of each individual are therefore values that matter to us.

Company Management: Wolfgang Balle, Johannes Maier (CEO), Jürgen Förster

#### **OUR COMPANY HISTORY**

- 1890 Company founded as a lock manufacturer by Andreas Maier.
- 1920 Product range extended to include spanners.
- 1928 Production line assembly of FELLBACH LOCKS.
- 1951 Introduces clamping elements and diversifies into workpiece and tool clamping technology.
- 1965 Toggle clamps extend the AMF product range, AMF catalogues are now printed in ten languages.
- 1975 Further specialisation into hydraulic clamping technology.
- 1982 Clamping and fixture systems round off AMF's clamping expertise.
- 1996 AMF team organisation in all sectors of the business, Quality management with certification to ISO 9001.
- 2001 AMF Service Guarantee for all products.
- 2004 Introduction of the ZPS zero-point clamping system.
- 2007 The magnetic clamping technology extends the AMF product range.
- 2009 Development and marketing of AMF Vacuum clamping technology.
- 2012 LOW-COST AUTOMATION gripping, clamping, marking and cleaning.
- 2014 AMF presents the most extensive product range of automation solution in zero-point clamping technology.
- 2017 Wireless sensoring systems extend the expertise into Industry 4.0 and blends seamlessly into the AMF product range.

#### PLEDGES THAT COUNT IN EVERYDAY LIFE

For this reason, we have a few principles that we follow by conviction and which always apply.

#### INDIVIDUAL DEVELOPMENT

Even if the product you need does not even exist yet, we will find the right solution with you: from special designs to new developments, everything is possible.

#### WARRANTY

If, despite our high quality standard, there is a complaint, this is dealt with quickly and unbureaucratically, even beyond the warranty period.

#### **HIGHEST QUALITY STANDARDS**

Careful manufacturing based on tradition since 1890, and naturally with a modern quality management system according to ISO 9001 for many years.

#### SHORT DELIVERY TIME

With over 5,000 articles in our warehouse, you can expect your order to be dispatched on the same day.

#### **COMPETENT SERVICE FROM EXPERTS**

Your local retail partner or the specialists in our team will find the right solution for every task.

#### **MADE IN GERMANY**

Our entire product range is developed and manufactured exclusively by our employees in Germany.

## **DESIGN COMPANY AMF -**FOR A SOPHISTICATED APPEARANCE

A cased lock is, first and foremost, an object that should fulfil its purpose reliably, day by day, for many years. Our development department combines this function with an individual design that is completely tailor-made to the location of your AMF cased lock. Making your door concept a real eye-catcher. See the individual fittings for yourself - designed & made by AMF. Our development department is there to help you:

Steffen Kommode | Product design Locks | kommode@amf.de

## FAQs on the subject of locks

## **EXPERTS SINCE 1890**

Almost every day we receive enquiries on the subjects of products, orders and shipping.

Questions about any topic your could imagine. We take your questions seriously, and are glad to answer them for you. Quality, reliability and speed have always been our top priorities.

Here we would like to present some of the questions that we receive most often. Perhaps one or more of them is just what you were thinking of asking.

#### HOW LONG DO I HAVE TO WAIT FOR MY DELIVERY?

Every order that we receive before 4:30 p.m. CET is shipped here at AMF on the very same day.

## CAN YOU SHIP DIRECTLY TO MY CUSTOMERS?

Of course. For a fee of five euros we will send the goods exactly according to your wishes.

Our capacities guarantee an availability of 98%. If you want to be absolutely sure, simply give us a call. You can reach us between 7:30 a.m. and 4:30 p.m. CET at +49 711/5766-0.

?

#### CAN YOU GUARANTEE ME CONSISTENT QUALITY?

Yes. And it is certified, too. Because AMF is a DIN EN ISO 9001-certified company. Our work processes are inspected annually.

#### WHAT FITTINGS ARE SUITABLE FOR WHICH LOCKS?

For our lock case product range there are fittings in stainless steel, aluminium and forged steel. These are suitable for all lock cases with profile cylinder bores. There are also fittings for all tube-frame locks and suitable fittings for garage door locks.

.

#### WHY DO AMF LOCK CASES NOT HAVE ANY ZINC DRAIN HOLES?

The locksmith creates the zinc drain holes for the entire gate after the gate has been completely welded together. The size and position of the holes are determined by his knowledge and experience and the position of the lock case.

1

#### WHAT IS THE DIFFERENCE BETWEEN A PZ LOCK AND A RZ LOCK?

AMF locks are used far beyond the borders of Germany. PZ stands for the profile cylinders used in Germany, RZ for the Swiss round cylinder.

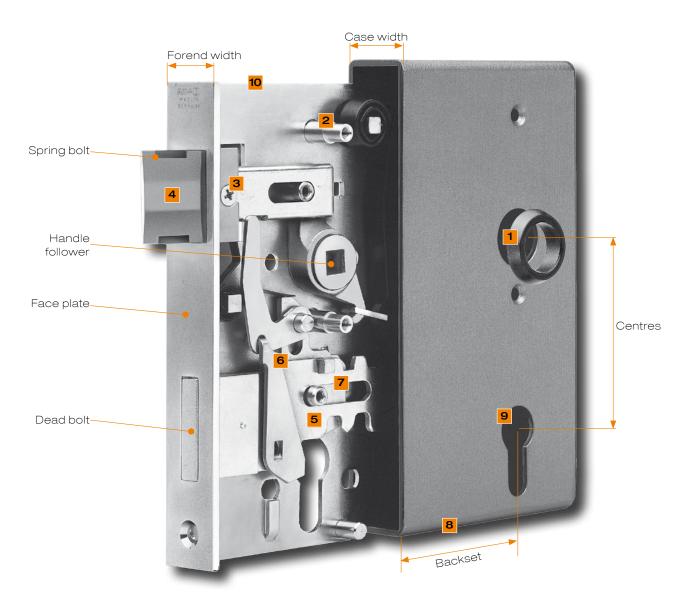

.

#### WHY DO AMF LOCK CASES HAVE MOVABLE SOLID SLEEVES?

The forces that arise when the lock is screwed tight in the lock case must not have any effect on the internal parts of the lock. This keeps the lock from being distorted and ensures free movement.

### Ten reasons to specify AMF lock case no. 140

#### 1 LEVER ROSES

included, 18 mm for light-alloy fittings.

#### 2 SOLID SLEEVES

continuous, for easy installation without distorting the lock.

#### <sup>3</sup> SPRING BOLT LENGTH

3 mm, projecting, convertible to 8 mm with long spring bolt. Right/left conversion with rugged Philips screw.

#### 4 SPRING BOLT THICKNESS

15.5 mm, steep bolt chamfers enable soft insertion with a long spring bolt travel of 12 mm.

#### 5 DEAD BOLT

2 rotations = 2 x pre-locking of the dead bolt is possible.

#### 6 NIGHT LATCH FUNCTION

2-part design for easy spring bolt actuation.

#### 7 PERMANENTLY LUBRICATED

Installation for long functional capability.

#### 8 EDGE RADII

with neat, even workmanship, made in Germany.

#### 9 CYLINDER

Optionally prepared for profile cylinder (PZ), Swiss round cylinder (RZ) or bit key adapter set.

#### <sup>10</sup> CORROSION PROTECTION

As standard. All parts including springs fully galvanized. Choice of brass or die-cast zinc spring bolt and dead bolt.

## ELEGANT LOCK CASES - ELEGANT QUALITY

- > Sophisticated visual design
- > Flawless workmanship
- > Extremely tough

#### STAINLESS STEEL - THE EMOTIONAL MATERIAL!

Elegant but not extravagant, understated but not just ordinary steel - it embodies the distinctive personality of its owner.

No finishing treatment, e.g. painting or galvanizing, is needed either before or after installation. This saves time and additional costs.

The price/performance ratio speaks in favour of an unlimited range of possible applications.

#### No. 140CNIG

#### Lock case, V2A

Stainless steel, polished, mesh 240. With zinc-plated lock no. 142CNIG, with stainless steel fore-end, polished. Brass spring bolt and bolt. Can be used for left or right closing by turning the spring bolt. Prepared for profile cylinder (PZ) or bit key adapter set. With night latch function.

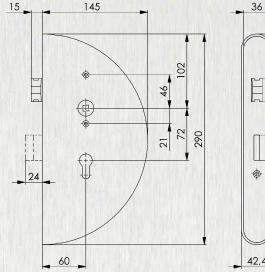

- Incl. handle rosette set no. 494.
- backset 60 mm
- rotation 2 turn
- follower 8 mm
- centres 72 mm

## LOCK CASE PRODUCT RANGE OF QUALITY STEEL - QUALITY AND SERVICE FROM AMF

- > All parts including the springs are corrosion-protected, thereby guaranteeing a long service-life
- > For lock cases no. 140, the spring bolt and dead bolt are available in brass
- > Consistent free movement thanks to precision parts and lubricated mechanical elements
- > Two continuous, movable solid sleeves allow trouble-free, distortion-free installation
- > Lower warehousing costs for our lock cases thanks to right/left conversion of the spring bolt
- > Guaranteed consistent quality standard with strict inspections
- > Shipment ex stock within 24 hours

#### **Application:**

This cased lock with downward locking spring bolt is suitable for doors and gates at which a large clearance width is required by a combined fixed/pass-through gate or a wing gate or sliding gate. This lock eliminates the need for a centre post. The vertical movement is achieved via the lever handles or the night latch function.

#### Note:

Rectangular tube, M10 studding and ramp shoe are not in our scope of supply.

Recommendations

Subject to technical alterations.

#### No. 140UMV

## Lock case for vertical multipoint locking, bare metal

With zinc-plated lock no. 142UMV, with stainless steel fore-end. Locking at top and bottom possible. Brass spring bolt and bolt. Can be used for left or right closing by turning the spring bolt. Prepared for profile cylinder (PZ) or bit key adapter set. With night latch function.

Incl. handle rosette set no. 494, 2 steplessly adjustable bolts, 2 adapters for M10 threaded rod.

# Lock case with roller latch rim deadlock for triangular and profile cylinders, bare-metal

with zinc-plated roller latch rim deadlock for triangular and profile cylinder no. 142RD, with stainless steel fore-end. Can be used on left or right. Prepared for triangular and profile cylinder (PZ). Without night latch.

- backset 30 and 60 mm
- rotation 1-turn
- spacing 72 mm

Order	Case width A	Closure	В	С	E	F	н	Weight
no.	[mm]		[mm]	[mm]	[mm]	[mm]	[mm]	[g]
557063	30	PZ	94	172	24	33,5	33,5	1470
557066	40	PZ	94	173	33	34,5	34,0	2550

#### **Application:**

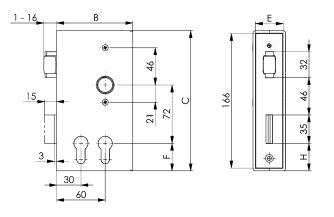

The practical solution when two people (or groups of people) require independent access: for example fire-brigade approaches or waste-container enclosures. The lock case with two cylinders permits access for the fire brigade or disposal companies via triangular socket spanner, and can also be integrated into the normal master-key system. After the bolt is pushed back, the gate can be pushed open easily via the roller latch (stationary hardware recommended).

#### Note:

The cylinders can be actuated separately from one another and open or close the bolt. Installation of triangular and profile cylinder without jamming of the lock regardless of key bit position possible when withdrawing the triangular socket spanner.

However, ensuring the following arrangement of triangular and profile cylinder is absolutely essential: - backset 30 mm: profile cylinder

- backset 60 mm: triangular cylinder

#### No. 142RD

## Roller latch rim deadlock for triangular and profile cylinders, zinc-plated

with stainless steel fore-end. Can be used on left or right. Prepared for triangular and profile cylinder (PZ). Without night latch.

- backset 30 and 60 mm
- rotation 1-turn
- spacing 72 mm

LOCKS FOR GATES AND DOORS 47

### **Electric door-opener**

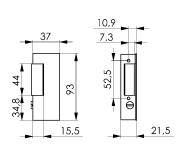

#### No. 148

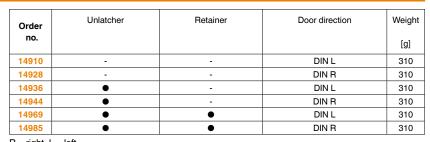

#### **Electric door-opener**

Operating voltage 6-12V. For alternating current (protection class IP65), fail-safe version.

14936/14969

R = right, L = left

#### Application:

With both the striking box and the cased lock, the electric door-opener is installed from the front. The recesses for the door opener must be cut out in the strike plate, strike box or lock case.

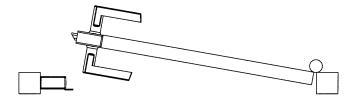

#### On request:

Version without unlocking and without retainer (latching) in closed-circuit design available in 12V or 24V direct current.

#### Example: Door closing DIN L with ET for door direction DIN L

#### Retainer

The retainer keeps the door opener unlatched until the door is opened even after contact is made. Entry is only possible once. The retainer functions by internal electronics. Retaining function for one-off, time-delayed entry.

#### Unlatcher

Unlatching is performed using the adjustment screw and deactivates the door opener function during visiting hours. The door opener spring bolt is movable, the door can be opened and closed as many times as desired.

- Screw slot vertical = free access

- Screw slot horizontal = normal door opener function

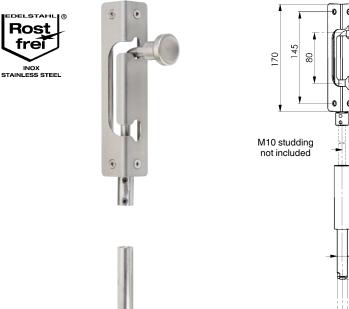

### **Espagnolette**

#### No. 151NI

#### Espagnolette, rail-guided

for securing the second door leaf of two-leaf doors. Stainless steel, can be used on left or right. Suitable for pipe profile from 30x30 mm. Accessory: 4 stainless steel flat-head screws,

stainless steel actuator knob, bare-metal bolt guide sleeve for latch, stainless steel bolt guide sleeve for latch, template for marking the aperture, installation instructions.

	Order	Suitable for tube profiles from	Thickness of the pipe profile	Weight	
	no.	[mm]	[mm]	[g]	
ĺ	11064	30 x 30	2	500	

#### **Application:**

This version is particularly resistant to dirt and ice and provides excellent protection against vandalism. The rail-guided movement of the handle prevents the espagnolette from being pushed down to the unlocked position.

#### Note:

Rectangular tube and M10 studding are not supplied as standard.

#### Shutter latch

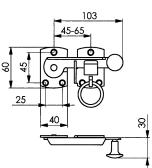

zinc-plated and yellow passivated. Robust design, with ring for opening. Trade pack: 10 pieces in a carton.

Order	Width	Weight
no.	[mm]	[g]
15198	123	200

#### Design:

Flat mounting face, suitable for use plastic and aluminium hinged shutters. Screw pattern reduces risk of splitting when wooden shutters are abused.

## GARAGE DOOR LOCKS FROM AMF

Our garage door locks have been securing thousands of garage doors for decades. They provide the expected additional security and reliability – and nowadays with electrical door drives.

#### SECURE LOCKING (FUNCTION)

by locking the rods rigidly, as in a deadlock, even with lateral rod pressure or when the rods are stuck.

#### EASY LOCKING -COMFORTABLE HANDLING

thanks to overhead cylinder and 90 mm distance from the T-handle. Rod forces do not affect the locking mechanism; the cylinder is always relieved.

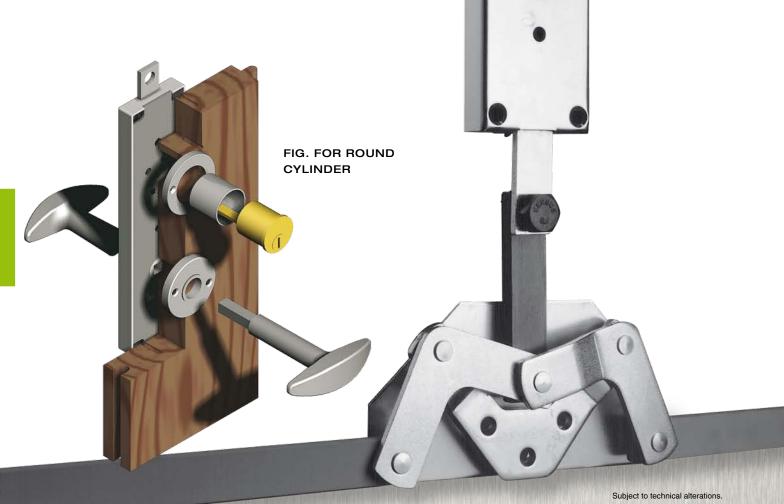

#### FREE MOVEMENT

thanks to long rod guide, three springs and good lubrication.

#### LONG SERVICE LIFE

by means of engineering design and careful manufacture, e.g.

- > 9 mm handle follower, double spring loaded, cannot escape to one side
- > all parts galvanized
- > all bearings lubricated during assembly.

#### No. 550, 551, 552, 554, 558

## Garage-door locks for up-and-over and leaf doors

## WE GENERATE EXCITEMENT -ON YOUR MOBILE DEVICE TOO

The "Clamping technology APP" offers you an overview of AMF's exciting clamping product range. No matter whether mechanical, pneumatic, hydraulic or magnetic clamping technology, as well as vacuum and zero point clamping systems – all the products are presented in detail in this APP, and you can see the numerous application options of AMF clamping technology at a glance.

All products can be downloaded as 2D and 3D CAD models, and be conveniently imported into all standard CAD programs.

Also stay up-to-date and read our news and PDF catalogues on

your mobile device.

THE CLAMPING TECHNOLOGY APP – FIND PRODUCTS, DOWNLOAD CAD DATA, STAY INFORMED...

These Terms of Payment apply for companies, legal entities governed by public law and public law special funds. Our goods and services are supplied exclusively on the basis of the following conditions. Any deviating purchasing conditions of the customer not expressly recognised by us will not become part of the contract through acceptance of the order. By placing the order and accepting the goods we deliver, the customer confirms its consent to our terms and conditions.

#### 1. Offer and contractual conclusion

All our offers are always subject to change without notice unless otherwise explicitly agreed. Our delivery contracts are based on the latest version of our catalogue. Dimension and weight values, as well as illustrations, drawings and data, are nonbinding and can be changed by us at any time. Therefore, deviations cannot be ruled out and do not justify any compensation claims against us.

Orders are considered accepted only when confirmed by us in writing. If, for organisational reasons, the customer does not receive a separate confirmation upon the delivery of goods, the invoice shall also be deemed the order confirmation.

#### 2. Prices

The prices are in EURO, ex-works, excluding VAT, packing, freight, postage and insurance. Unless otherwise agreed, our list prices valid on the day of delivery shall apply. For orders below 50 EUR goods net, we must make a minimum quantity surcharge of a 10 EURO for cost reasons.

#### 3. Tool costs

Unless any other agreements have been reached, the tools fabricated for the purpose of executing the order shall remain our property in all cases, even if we have invoiced a tool cost component separately.

#### 4. Payment

Unless otherwise stated on the invoice, the purchase price falls due for net payment within 30 days of the invoice date (without deduction of discount). Invoice amounts of below 50 EURO are due for payment immediately.

In case of payment default, we shall be entitled to charge default interest. The amount corresponds to our interest rate for current account credits at our main bank; the minimum however being 8 percentage points above the relevant base interest rate applied by the European Central Bank. Moreover, in case of default following written notice to the customer, we shall be entitled to cease to fulfil our obligations until payments are received.

#### 5. No set-off

The customer can set-off only with legally confirmed or undisputed counterclaims.

#### 6. Right of withdrawal in case of delayed acceptance or payment and insolvency

If the customer fails to accept the goods in due time, we shall be entitled to set a reasonable period of grace, after which we can dispose of the goods elsewhere and supply the customer on a reasonably longer term. Our rights to withdraw from the contract under the provisions of Section 326 BGB and demand damages for non-performance shall not be affected. If the customer fails to pay for the goods once payment is due, we shall be entitled, at the end of a reasonable period of grace we have set, to withdraw from the contract and demand the return of any goods already supplied. Section 323 BGB remains unaffected in all other cases.

If the customer applies for the opening of insolvency proceedings, we shall be entitled, prior to the ordering of security measures by the insolvency court, to withdraw from the contract and demand the immediate return of the goods.

#### 7. Customer-specific fabrications/project fabrications (custom fabrications)

Customer-specific fabrications require binding information on design, quantity etc. in written form at the time of ordering. For manufacturing reasons, we reserve the right to supply up to 10% above or below the order quantity. Technical modifications or cancellations are subject to any costs incurred. The return of customer-specific fabrications is impossible.

#### 8. Delivery and packaging, transfer of risk

The delivery date is non-binding; although stated to the best of our knowledge. It is subject to us receiving correct, defect-free and complete deliveries. The stated delivery dates relate to completion in the factory, starting on the day the order is accepted by us. Delivery is EXW (ex-works) in accordance with Incoterms 2010. Therefore, the costs are borne by the customer. The risk is transferred to the customer when the goods are passed to the person, company or facility nominated to execute the shipment. This applies also for partial deliveries, or if we have assumed responsibility for delivery and installation. The risk shall be transferred to the customer even in the case of delayed acceptance.

In the absence of specific shipping instructions, we shall proceed as we deem fit and without any obligation to the cheapest or most expedient method. The customer agrees that the order can also be delivered in parts, insofar as this is reasonable for the customer. We shall charge a 5 EURO processing free for shipping to third parties that we supply on behalf of the customer.

The packaging complies with the packaging ordinance. Disposable packaging shall be charged at cost price. The packaging cannot be taken back.

#### 9. Performance impediment and/or impossibility

If we are hindered in the fulfilment of our obligation due to the onset of unforeseeable circumstances, which we are unable to avoid despite reasonable effort in relation to the nature of the circumstances (e.g. operational interruption, delay in the delivery of important raw materials, defects in the delivery), the delivery time shall be extended by a reasonable period, insofar as the supply of goods or services is not rendered unreasonably difficult or impossible.

If we have to accept that these circumstances are not only temporary, we shall be entitled to withdraw from the contract either in whole or in part.

If the supply of goods or services becomes impossible, the customer shall not be obliged to furnish its own contractual service. Section 275 BGB applies mutatis mutandis. If, however, the customer is solely or predominantly responsible for the

circumstances that led to impossibility, it shall remain under an obligation to render the return service. The same applies if this circumstance occurs at a time when the customer is behind schedule with acceptance.

#### 10. Samples/returns

Samples shall be provided only against payment. If samples or models are provided, a credit note shall be issued with the subsequent order if the order value is 125 EURO net or more. Goods can be returned only by agreement, although custom fabrications are excluded from such return.

In the case of returns for which we are not responsible (e.g. incorrect order), we shall charge a processing fee of 10%, the minimum value, however, being 7.50 EURO.

#### 11. Retention of title

The goods shall remain our property unless full payment of all claims and/or until the cheques provided for this purpose are honoured. The itemisation of claims in an ongoing invoice, as well as balancing the account and the recognition thereof does not affect the retention of title. The customer is entitled to sell on the retained goods during the ordinary course of business. However, the customer is not permitted to pledge the goods or transfer them by way of security. It shall assign its claim ensuing from the selling on of the retained goods to us in advance. The customer shall be entitled to collect the claim to the extent that it has fulfilled its obligations towards us. At our request, the customer shall be obliged to state third-party debtors and we shall be entitled to report this and the assignment.

#### 12. Property rights

We reserve property rights and copyrights to all contractual documents such as drafts, drawings, calculations and cost estimates. Such documents must not be reproduced or disclosed to third parties without our consent. Any rights to patents, utility models etc. reside solely with us, insofar as such patents have not yet been filed. Our products are allowed to be replicated only with our written consent.

If objects are fabricated according to drawings or samples, the customer shall warrant that any third party property rights are not infringed by manufacture or delivery. If a third party forbids manufacture and delivery on account of property rights, we shall be entitled to stop manufacture and delivery immediately. The customer shall be obliged to reimburse us with all costs incurred and indemnify us from third party compensation claims. Compensation claims by the customer are impossible.

#### 13. Warranty

If the customer agrees with us a particular quality of the goods, we shall base this agreement on our technical delivery specifications. If we have to deliver according to customer drawings, specifications, samples etc., the customer shall assume the risk for suitability for the intended purpose. If, after the contract is concluded, the scope of goods or services is changed at the customer's request and this impairs the quality or suitability of the goods, claims for defects on the part of the customer shall be ruled out, insofar as such impairments are caused by the customer's requests for change. The time at which the risk is transferred is decisive for the contractual state of the goods. Wear and tear of wearing parts caused by ordinary use does not constitute a defect. Claims for defects are ruled out in the following cases in particular: Unsuitable or improper use, incorrect installation and/or commissioning by the customer or third party, normal wear and tear, incorrect or negligent handling - in particular excessive use -, unsuitable equipment, replacement materials, chemical, electrochemical or electrical influences, unless such defects are caused by ourselves.

If the goods contain a defects, we shall provide, following a reasonable period of grace set by the customer, either a replacement or a repair as we deem fit. If such subsequent performance fails, the customer shall be entitled to either reduce the purchase price or withdraw from the contract. Any further warranty claims are ruled out. In case of negligible deviations from the agreed quality, no claims for defects shall be recognised.

The discovery of defects must be communicated to us immediately in writing. In the case of recognisable defects, however, within 10 days of acceptance, in the case of non-recognisable defects immediately after they become evident. The warranty is 12 months, starting with delivery of the goods ex-works.

#### 14. Liability

With the exception of harm to life, body or health on account of a breach of duty by ourselves, our liability shall be limited to intent or gross negligence.

#### 15. Place of fulfilment, place or jurisdiction and governing law

The place of fulfilment for all obligations ensuing from this contractual relationship is D-70734 Fellbach.

The place of jurisdiction for all legal disputes ensuing from the contractual relationship is the court responsible for the headquarters of Andreas Maier GmbH & Co. KG.

All disputes ensuing from the contract or regarding the validity thereof shall be finally decided by a court of arbitration in accordance with the Court of Arbitration Ordinance of the German Committee for Arbitration Court Procedures or the Conciliation and Arbitration Arrangement of the International Chamber of Commerce, recourse to ordinary courts of law being excluded. The legal dunning process, however, remains permissible.

German law shall govern (BGB and HGB). The applicability of the UN Convention on Contracts for the International Sale of Goods (CISG) is ruled out.

#### 16. Severability clause

If individual provisions become legally invalid, the remaining provisions shall not be affected. The legally invalid provision shall be replaced by regulations that most closely reflect the economic purpose of the contract with reasonable consideration for the mutual interests. The publication of these Terms of Sale, Delivery and Payment renders all previous versions invalid. This does not apply for any contracts concluded prior to announcement.
